

Amanda Zhang

UX Designer — Research-led product design

zhangamanda.com | [LinkedIn](#) | azhang.0302@gmail.com | 502.708.8068 | Alvaton, KY — Open to Nashville & Remote

UX designer with a research-led practice — moderated interviews, survey design, and usability testing — who turns qualitative findings into prioritized features, user flows, and high-fidelity screens. BFA in UX Design; experienced working directly with developers through handoff and iteration.

SKILLS

UX Research: User interviews, survey design, usability testing, qualitative synthesis, localization research, insight reporting, research presentations

Design & Product: Wireframing, prototyping, high-fidelity UI, user flows, interaction design, feature prioritization, iterative design

Collaboration: Stakeholder communication, developer handoff, cross-functional alignment, active listening

Tools: Figma, FigJam, Google Forms, Jira, Google Slides

UX EXPERIENCE & PROJECTS

UX Designer — StreetFeast (independent mobile app project) | July 2025 – Present

- Ran customer and vendor surveys (69 responses) to validate the discovery problem on both sides of the marketplace
- Synthesized findings into the feature priorities and primary user flow for the first release
- Designed the customer and vendor experiences in Figma alongside ongoing development
- Collaborated with 2 developers through implementation, refining designs from testing with food truck owners and customers

UX Researcher & Designer — Drink Studio (academic team project) | March 2025 – May 2025

- Surveyed 8 participants on motivations and pain points in making drinks at home
- Contributed ideation in FigJam, mapped the user flow, and produced sketches and screens for a step-by-step tutorial app
- Tested the flow with 6 participants across 9 tasks — 100% task success, SUS score of 91.67
- Added swipe navigation between steps after testing showed participants expected it

UX Research Volunteer — Leaderboard Golf | March 2025 – April 2025

- Moderated in-person interviews with 5 golfers — 3 complete sessions, 2 ended early — evaluating feature clarity, usability, and interaction flow
- Recruited participants through a local golf course and synthesized findings into a research summary with 3 prioritized recommendations

UX Design Intern — Idea Lab, Western Kentucky University | August 2024 – November 2024

- Contributed user research to the next iteration of SunSketcher, WKU's NASA-supported citizen-science eclipse app
- Partnered with a second researcher on localization for three target markets — Spain, Iceland, and Greenland — assessing language needs and whether the app should ship translated or in universal English
- Synthesized secondary sources in the absence of direct user access to identify where universal design would serve all three markets and where market-specific treatment was needed
- Presented findings to stakeholders and developers, translating them into actionable design direction
- Contributed to usability testing with 16 participants; the redesign reached 92.7% task success and a SUS score of 86

ADDITIONAL EXPERIENCE

Server — Hokkaido Ramen and Sushi | August 2025 – Present

- Manage multiple tables through peak service, coordinating with kitchen and management to keep service consistent

General Manager — Auntie Anne's (promoted from Shift Lead) | October 2023 – October 2025

- Built scheduling and staffing plans around traffic patterns and team capacity, improving workflow and coverage
- Resolved customer issues, streamlined order processes, and turned corporate updates into actionable team workflows

EDUCATION

Bachelor of Fine Arts, UX Design — Western Kentucky University, Bowling Green, KY | May 2025

President's Scholar (Spring 2024) · Dean's List (Fall 2023)

AIGA Student Organization — Co-President / Chair | Fall 2024 – Spring 2025
